1 Freeware End-User License Agreement (EULA) of mbFXWords setup package, "the Software", 16. March 2025

This End-User License Agreement is a legal agreement between you and Marc Buelow, further named "txt-soft.com". This EULA (end-user license agreement) agreement governs your acquisition and use of our [mbFXWords](#) software directly from txt-soft.com or indirectly through a txt-soft.com authorized distributor. The Software is not sold, it is licensed. Please read this agreement carefully before completing the installation process and using the [mbFXWords](#) software. It provides a license to use the [mbFXWords](#) software free of charge and contains warranty information and liability disclaimers. By clicking "accept" or installing and/or using the [mbFXWords](#) software, you are confirming your acceptance of the software and agreeing to become bound by the terms of this agreement. If you are entering into this EULA agreement on behalf of a company or other legal entity, you represent that you have the authority to bind such entity and its affiliates to these terms and conditions. If you do not have such authority or if you do not agree with the terms and conditions of this agreement, do not install or use the Software, and you must not accept this agreement. This agreement shall apply only to the software supplied by txt-soft.com herewith regardless of whether other software is referred to or

described herein. The terms also apply to any [txt-soft.com](https://www.txt-soft.com) updates and support services for the Software, unless other terms accompany those items on delivery. If so, those terms apply.

2 General Contract Conditions:

a) **Source Code License:**

This is a setup product package software license. Complete [mbFXWords](#) source code is available under [Apache License Version 2.0](#) (<https://www.apache.org/licenses/LICENSE-2.0>): <https://github.com/open-hopin> It is free and open-source software (FOSS). This does not apply to this setup package here. The setup package is freeware only.

b) **Intended use:**

License is granted only for from [txt-soft.com](https://www.txt-soft.com) intended use:

- use the software on desktop computer only
- always use latest version of the software
- always ensure to also have alternative software ready for production use

c) **Quality:**

Software can deteriorate over time due to update changes in surrounding software environments. This is no lack of the originally downloaded software of earlier date of manufacture, instead it suggests to maintain a modern software ecosystem by over-viewing and combining suitable products as needed. Software quality can be at higher or lower level regarding the general application purpose and of what for it is indeed used. This software here comes for free, so [txt-soft.com](https://www.txt-soft.com) explicitly states that a medium quality, measured by customer satisfaction, can be expected. User explicitly agrees to and is aware of this by accepting this license agreement.

d) **Use this setup package for evaluation purposes only in countries with software product liability legislation:**

License of software setup package (the distributed setup ZIP via the Internet) for productive use is NOT granted for use in countries with software product liability, for example the EU. Instead user is encouraged to build FOSS (free and open-source software) from source (<https://github.com/open-hopin>) to gain full rights according to a pure open-source license. In countries with software product liability this license here is restricted in the following way: Only use the software installed by this setup package for evaluation purposes and in a safe, non-productive environment.

[txt-soft.com](https://www.txt-soft.com) will never surveil users or the use of [txt-soft.com](https://www.txt-soft.com) software.

A list of countries assumed to have extensive software liability regulation can be found here: [countries-with-only-evaluation-setup-package-license.htm](#).

e) Nature of AI:

Due to the nature of AI depending on AI model's strength and size sometimes hallucinations go withing the parsing of this program causing misleading information internally. This is not a failure as such of the program here but tolerated by the developer in leading to less accurate results or less program performance. Do not use the software if this is insufficient for your use case.

f) Freeware and Hobbyist Nature:

This software setup package is provided as freeware, developed with no own commercial intent and distributed as a hobby project with no guarantees of support, maintenance, or future updates. While both personal and commercial use are permitted, the software is provided free of charge, and no fees may be required for its use, redistribution, or access. By using this software, you acknowledge that it is offered "as is", with no professional use in mind.

3 Cyber Resilience save Environment:

If software runs in a save production environment, for example Windows 11, [mbFXWords](#) will be save. Make sure you use such an environment.
